
# WHEB Environmental Impact Fund Factsheet

31 May 2026

## Fund Objective and Investment Process

The investment objective of the Fund is to achieve capital growth over five years, investing globally in the shares of companies that provide solutions to environmental challenges and falling within certain sustainable investment themes. The Fund focuses on the opportunities created by the transition to zero carbon and sustainable economies. The investment team selects high-quality companies from WHEB's environmental themes with strong growth characteristics to create a global portfolio focused on environmental solutions. We develop long-term relationships with company managements to promote the best environmental and economic outcomes.

## Significant Portfolio Changes

| Stock name | Purchase or sale | Theme | Brief description of purchase or sale rationale |
|---|---|---|---|
| Power Integrations | Sale | Resource Efficiency | Strong AI driven momentum left valuation increasingly stretched, with expectations running ahead of near term earnings delivery and broader end market fundamentals. |
| Tetra Tech | Purchase | Environmental Services | Highly specialised environmental consulting group supported by water, infrastructure and sustainability spending, offering resilient growth at an attractive valuation. |

## Top 10 Holdings as of 31 May 2026

| Stock name | Theme | Description | Holding |
|---|---|---|---|
| First Solar | Cleaner Energy | US-based manufacturer of solar photovoltaic (PV) panels. Headquartered in Arizona, the company is the leading supplier of thin-film modules that are used primarily in utility-scale and commercial power plants. The company operates a sector leading approach to manufacture and recycling of its solar modules. | 4.72% |
| Aptiv | Sustainable Transport | Aptiv's mission is to 'enable a safer, greener and more connected future of mobility'. The company's products include high-voltage wiring and electrical centres, power distribution boxes and battery connectors, plug-in chargers and light-weight aluminium wiring all for use in electric vehicles. | 4.45% |
| Keyence | Resource Efficiency | Manufacturer of sensors and measuring instruments for factory automation, which help to achieve efficiency, energy savings, reduced wastage, and quality management | 4.31% |
| Infineon Technologies | Sustainable Transport | Manufacturer of semiconductors and related systems. Products are key enablers of several important end markets, including electric and hybrid road vehicles, renewable power generation such as wind turbines, and efficient power management in industrial systems | 4.06% |
| TE Connectivity | Sustainable Transport | Leader in the connectors and sensors industry. Its electronic components, network solutions and wireless systems help to improve safety, as well as fuel and energy efficiency, in automotive and other markets | 3.96% |
| Xylem | Water Management | World leader in air conditioning systems and services. The company also has an offering in the heat pump space, which brings a 300% efficiency gain compared with the system it would replace. | 3.83% |
| Ecolab | Water Management | Global provider of hygiene products (e.g. detergent) to restaurants, hotels and hospitals. Products need much less water to be effective | 3.73% |
| Nextpower | Cleaner Energy | A leader in the solar tracker market. The company integrates software solutions with ground-mounted tracker products to maximise energy output. | 3.64% |
| Versigent PLC | Sustainable Transport | A producer of EcoSmart chips which reduce energy waste when an appliance is in standby mode. Unlike traditional power conversion solutions requiring dozens of components, the company's integrated solutions reduce the bill of materials and the size of the integrated circuit board. | 3.50% |
| Trimble | Resource Efficiency | Leading provider of location-based solutions, which contribute to efficiency and productivity improvements. Operates predominantly in the construction, transport, and agriculture end markets | 3.48% |

### Biggest Movers over the month in local currency – Top 3 and Bottom 3 Performers

| Stock Name | Performance in month[3] | What happened |
|---|---|---|
| First Solar | +51.96% | The company reported reassuring results and reiterated its guidance which turned around the negative sentiment on the stock. Expectations also improved regarding policy support and a demand spike ahead of the 4 July safe harbour deadline. |
| Infineon Technologies | +41.97% | Infineon increased its guidance and gave a very bullish outlook not only around data centres but also pointed to a recovery in autos and industrials orders in 2H. |
| Nextpower | +31.29% | Nextpower reported a “beat-and-raise” and continued to expand its product offering with a number of acquisitions which were viewed positively by the market. |
| | | |
| Trimble | -16.21% | Despite stronger Q1 results and raised guidance, investors focused on softer core end market conditions and questioned the pace at which software, recurring revenue and AI initiatives can offset cyclical pressure. |
| Trane Technologies | -8.37% | Trane’s underperformance reflected short term consolidation following strong data centre led gains, as an in line print provided limited incremental surprise. |
| Vestas Wind Systems | -7.74% | The shares reacted to a bearish view from a competitor (GE Vernova) on current permitting issues and tariffs affecting the US wind market. |

Totals may not sum due to rounding.

## Benchmark

This fund has no benchmark. The thematic focus of the WHEB strategy means that our environmental investable universe overlaps with the MSCI World Index by around 5%, leading to significant structural biases in the fund's exposure. These style biases towards growth, quality and mid-cap are all derived from the strategy's focus on solutions to sustainability challenges. It means that we tend to be absent from significant sectors of traditional indices, such as financials and energy, and have significant overweights in other parts of the market, such as industrials.

### Footnotes and important risk warnings

1. The average holding period is calculated by WHEB in accordance with the requirements of the UCITS V directive, and derived from fund turnover over the last 12 months as of the end of the reporting month. This calculation method can result in very long reported holding periods when most of the trading volume is explained by subscriptions and/or redemptions, and can even result in a negative portfolio turnover figure when subscriptions years and redemptions exceed purchases and sales. As of 31 May 2026 the UCITS holding period based on the UCITS methodology was 3.49 years. During periods when the resulting figure is negative or more than 100 years, we will report the outcome here within the footnotes and not on the front page of this factsheet to avoid the risk of presenting a confusing figure.
2. Data for Theme Breakdown, Geographic Allocation and Market Capitalisation allocation are provided by FactSet. Small differences in cash percentage figures may arise.
3. Top and bottom performers in local currency.
4. Class S Accumulating Share are only available for the subscription by the founder investors at the sole discretion of the Directors.
5. The Fund had an extended first accounting period from launch date, 8th December 2021, until 31st December 2022. The first set of interim accounts was prepared to 30th June 2022 and the annual accounts prepared to 31st December 2022.

Risks include: the value of units in WHEB Environmental Impact Fund ("Fund") may increase or decrease and you may not get back the amount originally invested, for reasons including adverse market and foreign exchange rate movements. **Past performance is not a reliable guide to future performance. Your capital is at risk.** The Fund invests in equities and is exposed to price fluctuations in the equity markets, and focuses on investments in mid-sized companies in certain sectors so its performance may not correlate closely with the MSCI World Index (the Fund's benchmark).
